

I would like to thank all the members and ACE Board for another successful year at the ACE Conference. I was a scholarship recipient this year, as well as an instructor, and I appreciate having the opportunity to represent those in my field at the symposium. Overall, there are always things to be learned through the classes, the guest speakers, and most of all, each other while we are there. The guest speaker, Dr. Peppers, added a lot of life to the symposium and her knowledge and expertise was very welcome to all participants.

Thank you again for a very informative, enjoyable seminar. It has helped me tremendously with being successful in my career.
